

PRIYADHARSHINI RAJENDRAN

Trichy, Tamil Nadu | +91 9080738403 | priyadharshinirajendran1701@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

MCA student with hands-on experience in Full-Stack Development using React.js, Node.js, Express.js, and MongoDB, along with AI/ML. Developed MERN applications and an AI-powered healthcare solution with REST APIs, secure authentication, and cloud deployment. Passionate about building scalable web applications and continuously learning modern technologies.

SKILLS

Programming Languages: Java, Python, JavaScript

Web Development: HTML5, CSS3, React.js, Node.js, Express.js, MySQL, MongoDB

Core CS Concepts: Object-Oriented Programming (OOP), Data Structures, SDLC

AI/ML & Tools: Artificial Intelligence, Machine Learning

API & Testing Tools: Postman

Development & Experimentation Platforms: Google Colab, Jupyter Notebook

Development Practices: REST APIs, CRUD Operations, Agile Fundamentals

Cloud & Deployment: MongoDB Atlas, Render, AWS, Ubuntu Linux (Basics)

Version Control & DevOps: Git, GitHub, Docker (Basics), CI/CD Concepts (Basics)

Other Skills: Teamwork and Collaboration, Time Management, Problem Solving, Decision Making

EXPERIENCE

Web Development Intern

Jan 2026 – Apr 2026

- Developed modules for a Smart Recruitment & Candidate Tracking System using React.js, JavaScript, HTML5, and CSS3, delivering a responsive and user-friendly interface.
- Built and integrated RESTful APIs using Node.js, Express.js, and MongoDB to support CRUD operations and efficient candidate data management.
- Used Git and GitHub for version control and collaborated with the development team following Agile practices.

Data Processing Analyst, NielsenIQ

Jul 2022 – Nov 2022

- Analyzed and processed large datasets using OGRDS, Python, and SQL to support business reporting and insights.
- Streamlined data cleaning and transformation by building automated workflows, cutting down manual effort and improving efficiency by about 40%.
- Delivered reliable reports with 99% accuracy by applying structured validation checks before final output.

PROJECTS

Deep Learning-Based Brain Tumor Detection with Privacy Preservation

Tech Stack: Python, TensorFlow, Keras, Flask, OpenCV, AES, PBKDF2

- Developed an AI-powered MRI-based brain tumor detection system using five CNN architectures, including EfficientNetB0 and Custom CNN.
- Achieved up to 99% accuracy with EfficientNetB0 and 99.33% accuracy with VGG16 on evaluation datasets.
- Built a Flask application with real-time prediction, confidence scoring, and dynamic model selection.
- Secured patient records using AES encryption, PBKDF2 authentication, and role-based access control.

Todo Application — MERN Stack

Tech Stack: React.js, Node.js, Express.js, MongoDB

- Developed a MERN-stack task management application with CRUD operations and task status tracking.
- Integrated RESTful APIs and MongoDB for persistent data storage and efficient data management.
- Implemented responsive UI, search functionality, and state management using React.js.
- Deployed the application on Render using MongoDB Atlas for cloud-hosted database management.

EDUCATION

SASTRA Deemed University — MCA, Computer Application

Jun 2024 – May 2026

CGPA: 7.3 / 10

Bishop Heber College — BCA, Computer Application

Jun 2019 – Jun 2022

CGPA: 8.2 / 10

CERTIFICATIONS

- NPTEL – Cloud Computing & IoT Jan 2026 – Apr 2026
- Udemy – JavaScript & React.js Dec 2023
- EduBridge – AWS Cloud Practitioner Jan 2024 – Mar 2024
- IELTS Academic Apr 2023
